TITLE : TRANSFER SHEET

ABSTRACT : **PURPOSE:** To provide a transfer sheet prevented from the generation of peeling or a crack and enhanced in durability by forming a release layer from an ionizing radiation curable resin having high hardness and suppressing the concn. of strain to the ionizing radiation curable resin release layer by a stress relaxing layer.

CONSTITUTION: An ionizing radiation curable resin release layer 3, a stress relaxing layer 4, if necessary, a pattern layer 5 and an adhesive layer 6 are successively provided to a substrate sheet 2 to obtain a transfer sheet wherein the thickness of the ionizing radiation curable resin release layer 3 is 1/2 or less that of the stress relaxing layer 4 and the sum thickness of the ionizing radiation curable resin release layer 3 and the stress relaxing layer 4 is 4μm or less and the elongation at break of the stress relaxing layer 4 is 1.5 times or more the ionizing radiation curable resin release layer 3.
